

## Logistics Commander (LC)

Primary function: resources, communications systems and technical/logistical support. This role must not drift into Emergency Coordinator responsibilities.

### YOU REPORT TO / REPORTING STRUCTURE

Reports to the Incident Commander (IC).

#### FIRST 0–3 MINUTES

- Report to IC.
- Support Command Post setup.
- Confirm radios/phones operational.
- Prepare required equipment.
- Identify vehicle/driver availability.
- Check backup communications.
- Confirm power/lighting availability.

#### NEXT 3–10 MINUTES

- Prepare radios and spare batteries.
- Prepare torches/emergency lighting.
- Prepare vehicles and fuel.
- Prepare stretchers, first-aid supplies, blankets and water.
- Prepare PPE, generators/backup power and barriers/cordons.
- Prepare other incident-specific equipment.

### ONGOING RESPONSIBILITIES

- Maintain communications capability.
- Track resources issued.
- Manage vehicles, drivers and fuel.
- Maintain backup power.
- Arrange replacement equipment.
- Support evacuation transport.
- Support airstrip/medevac logistics where applicable.
- Report resource shortages to IC.

### DO NOT

- Do not direct tactical responders unless specifically delegated by OC/IC.
- Do not take over the EC incident-documentation role.
- Do not authorise evacuation independently.

### BEFORE ALL CLEAR / HANDOVER

- Confirm equipment recovered / accounted for.
- Report resource status to IC.
- Assist with logistics debrief.

### FORMS / TOOLS TO GRAB

- Generator & Fuel Register (where applicable)
- A34 Radio Code List
- A4-TZ or A4-KE Priority Contact Card

### REMEMBER

You keep the response equipped and connected. Documentation and tactical direction belong to the EC and OC — stay in your lane.
