

Snakebite Quick Guide

First aid protocol and identification / anti-venom contacts. Post beside the medical kit and Priority Contact Card.

Quick Protocol

- ☐ Keep the patient calm and as still as possible; immobilise the bitten limb with a splint.
- ☐ Do NOT cut the wound, suck out venom, or apply a tourniquet.
- ☐ Apply a light compression bandage above the wound.
- ☐ If the patient stops breathing, start CPR immediately.
- ☐ If it's safe, photograph the snake to help with identification — never try to catch it.
- ☐ Evacuate per the Medical Emergency protocol; call for identification and anti-venom guidance using the contacts below.
