

ICS Activation Checklist — Food & Water-borne Illness Outbreak

Printable version of the on-screen checklist for the Food & Water-borne Illness Outbreak scenario.

Time	Step	Actions	Lead / support	Confirmations
First report	1 — Spot the pattern	2+ similar cases in a short window = possible outbreak, not isolated illness. - Report to IC: "Code Outbreak — [number] — [symptoms]."	1st Responder / Medic	☐ IC alerted, pattern logged
15 min	2 — Activate ICS	- IC starts team; assigns OC, LC, Medic, EC. - EC opens Symptom Tracking Log (A41). - IC notifies Head Office.	IC / EC	☐ ICT/ERT activated, HO notified
15-30 min	3 — Contain the source	- Stop serving suspected item; hold stock, do not dispose. - Kitchen HOD pulls Batch Log (A45). - Switch to bottled/confirmed-safe water if suspected.	OC / Kitchen HOD / LC	☐ Source stopped, stock retained
30-60 min	4 — Care for affected	- Medic checks for dehydration; oral rehydration in small sips. - Severe cases → medical evacuation (A18 / A6).	Medic / Responders	☐ Assessed, evac triggered if needed
1-2 hrs	5 — Deep clean & isolate	- Deep clean kitchen / prep / water points. - Unwell staff off duty until recovered. - Retain labelled samples, refrigerated.	Kitchen HOD / Housekeeping / LC	☐ Cleaned, staff off duty, samples kept
2-4 hrs	6 — Communicate with guests	- Calm, factual briefing; no alarm. - All comms through IC only.	IC / EC	☐ Guests briefed via IC
24 hrs	7 — Debrief & reporting	- Debrief within 2 hrs of stabilising. - EC submits report to Head Office within 24 hrs. - Review food/water/hygiene procedures.	IC / EC	☐ Debrief held, report filed
