

ICS Activation Checklist — Severe Weather & Natural Disaster

Printable version of the on-screen checklist for the Severe Weather scenario.

Time	Step	Actions	Lead / support	Confirmations
Pre-incident	Phase 0 — Monitoring & readiness	- Monitor weather advisories daily; review emergency supplies and shelter readiness. - Communicate early warnings to guests and team members.	IC / OC / LC / EC	☐ Alert issued · resources secured
0–1 min	Step 1 — Check safety	Identify the hazard (flood, storm, earthquake, wind, lightning); alert IC: "Code Weather — [Type]."	1st Responder / Security / OC	☐ Guests relocated · IC notified
1–3 min	Step 2 — Activate ICS / assess risk	IC activates ERT and assigns roles; determine whether to shelter in place or evacuate; EC logs actions.	IC / EC	☐ ICT/ERT activated · HO notified ☐ Communication functional
3–10 min	Step 3 — Protect guests & team	Move guests to designated safe buildings away from windows and trees; LC cuts power if flooding risk; OC confirms all zones secured.	OC / LC / Responders	☐ Guests safe · headcount done · power off
10–30 min	Step 4 — Ongoing monitoring	Monitor wind, rain, lightning changes; Medic treats minor injuries or shock; IC provides status updates to Head Office.	IC / EC / Medic	☐ Patients stabilised · HO updated
30–60 min	Step 5 — Contain impact / stabilise	Secure flooded areas and shut off utilities; check vehicle readiness for evacuation if conditions worsen.	OC / LC / IC	☐ Flooded areas secured, power cut ☐ Evacuation vehicles prepared
After All Clear	Step 6 — Recovery & assessment	Inspect for damage and safety risks; IC declares "All Clear" once confirmed safe; EC records incident timeline and cost of damage.	IC / OC / LC / EC	☐ Safety risks cleared · All Clear declared
≤ 24 hrs	Step 7 — Debrief & reporting	Conduct ERT debrief within 2 hours of All Clear; EC and IC submit the Severe Weather Report to Head Office within 24 hours.	IC / EC / All Commanders	☐ Debrief done · report sent · lessons logged
